

Mounting Bracket for Overflow Reservoir

Mounting bracket made from 1/8 -inch or 3/16-inch thick aluminum stock. One piece is 6.5 x 9 inches. The other is 1.5" 90 degree angle stock. One side of angle stock is cut to 1.0 inch, then further cut out to clear flange of water neck. Make a cardboard template and test fit before cutting metal. Larger piece is attached on "back" side of angle stock as shown in drawing.
